Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by PINNAVAIA (US 5,866,645).

The prior art of PINNAVAIA discloses composition and process for preparing organic-inorganic hybrid clay nanocomposites.

In the process of PINNAVAIA the clay component is first intercalated with organic ammonium (O) and inorganic metal precursor (I) to obtain O/I hybrid clay. The clay is washed in ethanol/water solution dried and mixed with either polymer precursor

or polymer melt to form nanocomposite (col. 13, lines 40-50) and examples. The excess inorganic compound is removed (eq. 1 col. 15) washed and dried.

Clay of PINNAVAIA is selected from smectite type swellable clays such as montmorillonite, smectite, beidelite and the like (col. 14, lines 60-67).

Polymers utilized can be thermoset or thermoplasts. Thermosets include polyethers, polyurethanes, epoxies, phenolics and the like (col. 18, lines 46-54). Thermoplasts include polyamides, polyesters, proteins, polyolefins and the like (col. 20, lines 31-39).

Metal precursors are selected from alkali metals, alkaline earth metals and mixtures thereof (col. 13, lines 42-47).

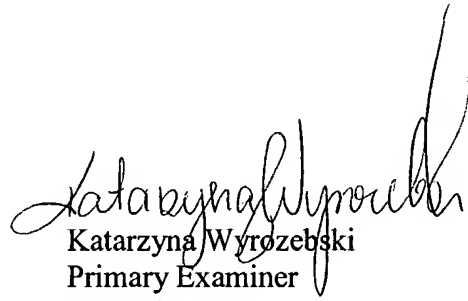

In the light of the above disclosure, the prior art of PINNAVAIA anticipates the requirements of claims rejected above.
